

CTC COMMAND

Fundamentals to remember

01

EMAIL

Read over the email you typically receive from planning in advance of the event. This gives you a chance to review and/or ask questions for planning.

02

DAY OF EVENT

Report to HQ, visit DO for truck(s) assignment; Visit Quartermaster for special event bag and CTC narcotics. Many Supts like to take their own issued computer as well but not mandatory.

03

DEPARTING HQ

Make sure you confirm with the other medics where to park at the CTC (PRN according to the event requirements)

04

BASICS

Book out on Apha and wait for channel instructions (if any)....Book 10-7 at destination. (If backing into the CTC, book 10-7 prior to building entry)

05

PARAMEDIC ROOM BRIEF

Assign medics to their locations; ensure all PPE is present, each team requires a radio (possibly radio adaptors or hearing protection). Usually, I survey for Banked or Paid at this point from the staff.

CTC COMMAND

06 CACC AND CTC COMMAND

Ensure you call CACC and roster trucks for your onsite crew(s). (Pre-hos). Also, the room adjacent to the paramedic room is CTC Command and they have a whiteboard to put a contact number in addition to radio contact; fill out your contact info.

07

CALL GENERATION

If one of your teams gets a call, inform CACC ASAP and request a transport...make your way to the call if possible but have your crew update quickly to keep transport coming or stand down. CTC Command requires all call numbers.

08

END OF EVENT

At the end of the event, gauge crowd size and scale down accordingly..retrieve all issued items. Record EOS times for staff not heading back to HQ.

09

10-19

Book out and state 10-19...fuel the truck at HQ upon return.

10

WRAP IT UP AT HQ

Return narcs and event bag to Quartermaster, record time of EOS for yourself and any staff who RTHQ.

Fill out event form from the planning divisions' email for the event (this must be done prior to leaving)
